

# THE SKETCHNOTE WORKSHOP

Dear All,

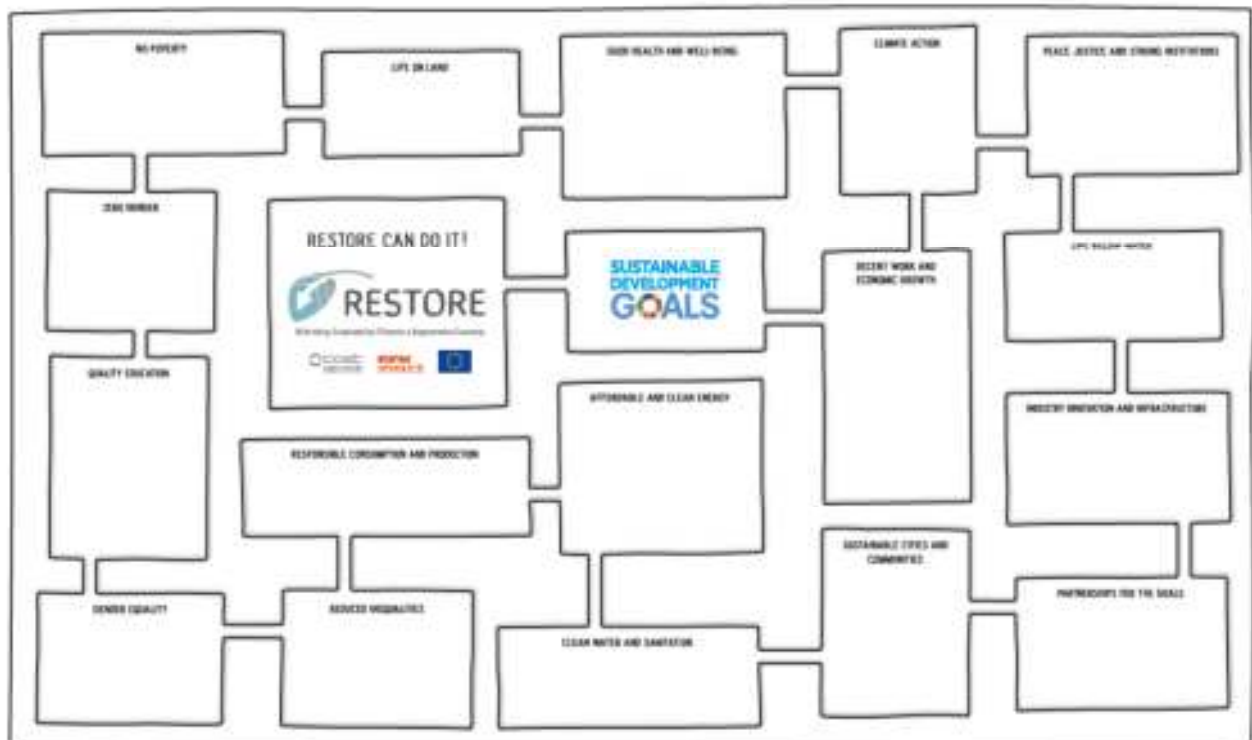

You are invited to reflect on the specific UN Sustainable Development Goal assigned to your team.

The number of your table matches the official number of the Goal assigned to your team.

Each team has a **facilitator**. Her/his role is to keep the discussion thread and monitor the timing.

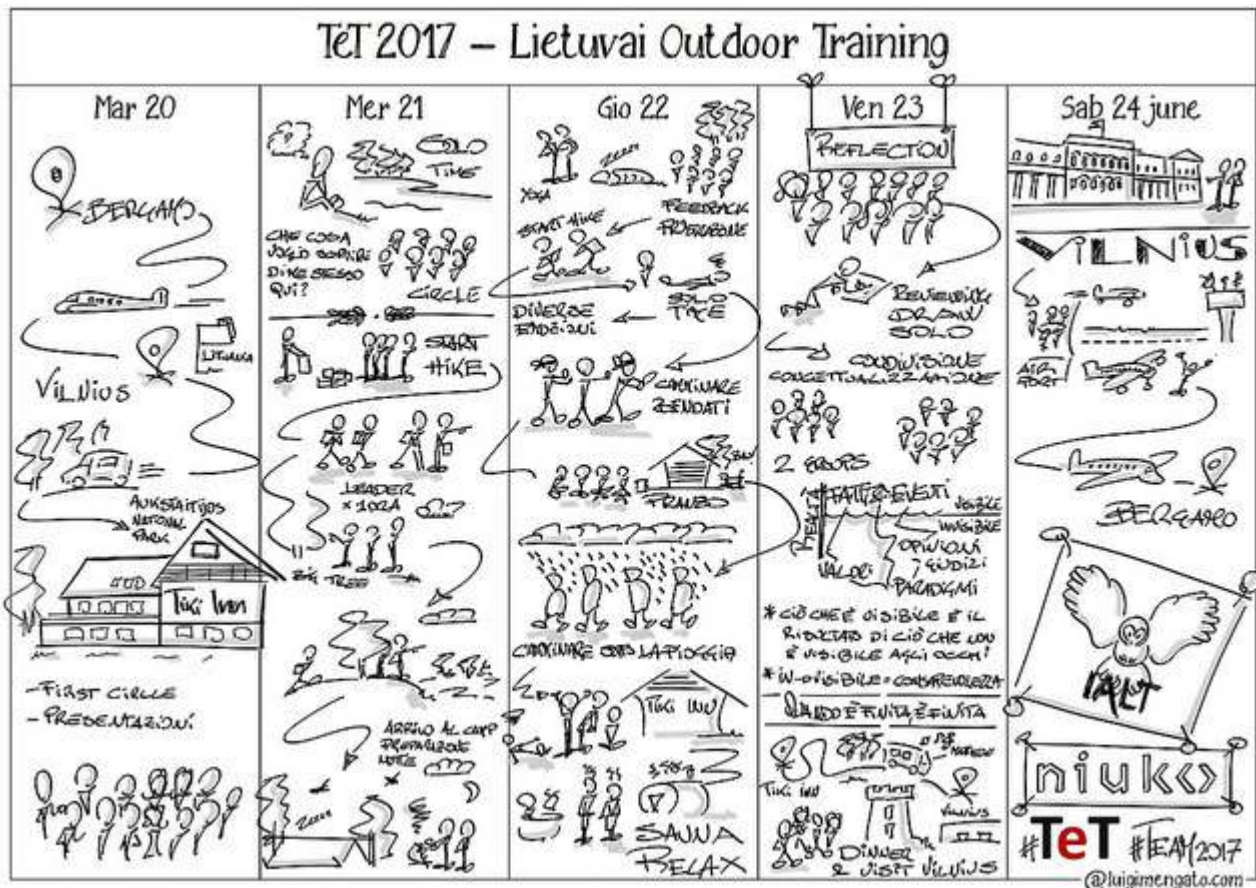

The expected result of the team`s work is a Sketchnote drawn on the piece of puzzle you have received, representing the output of your discussion

- Please keep in mind these suggestions:
  - Dedicate half of your time (ca. 11:30 – 12:30) to discuss and generate ideas. Take notes, write down and sketch during the discussion;
  - From 12:30 a.m. to 1 p.m. create the draft of your Sketchnote
  - After lunch, you will have another 30 minutes (from 2p.m to 2:30 p.m.) to finalize your Sketchnote and plan what to say during your presentation (max. 5 minutes each). The Facilitator will keep the notes of the Presentation.

## WHAT IS A SKETCHNOTE?

Sketchnotes are as much a method of notetaking as they are a form of creative expression. Sketchnotes don't require high drawing skills, but do require a skill to visually synthesize and summarize via shapes, connectors, and text.. This is an example of a Sketchnote:

### How to create a Sketchnote:

- Draw a draft copy of your Sketch on a piece of paper.
- When you have the final version, you can start drawing on your piece of puzzle
- Draw your Sketch using exclusively the black felt tip pen.
- WAIT UNTIL YOUR BLACK DRAWING IS COMPLETELY DRY!!
- Then use the color felt tip pen to draw the shadows.
- Use the Visual Vocabulary for inspiration.
- A Sketchnote is made 50 % of drawings and 50% of text
- Keep your Sketchnote inside the frame
